

DELIVERY- and SERVICE-PROGRAM

Self-cleaning Filters Type DELTA-STRAIN und DELTA-SCF

For hydrous, viscose and super viscose media
No disposal of filter candles, bags etc.

Automatic Backflush Filters Type DELTA-BFF

No moving parts within the filter system
Very low-wear and robust design

Basket filter Type DELTA-SKS and DELTA-SKB

Made of stainless steel and carbon steel

Basket filter Type DELTA-SK

Made of stainless steel, carbon steel and plastic

Basket filter Type DELTA-OV and DELTA-OW

As single filter, single filter with multibasket and double basket filter with switch-over
Materials: Stainless steel casting, cast iron, cast steel, spheroidal graphite iron and bronze

Candle filter Type DELTA-KF and DELTA-KFS

Made of stainless steel, carbon steel and plastic

Bag filter Type DELTA-BF and DELTA-BFS

Made of stainless steel, carbon steel and plastic

Temporary strainers Type DELTA-HS

Made of stainless steel and carbon steel

Y-Strainer

(strainer for pipes)

Made of stainless steel, cast steel and spheroidal graphite iron

Centrifugal Separator Type DELTA-ZFA

No moving parts

Free of operating materials

Self-cleaning basket Type DELTA-SRAK

For pumps and suction tubes

Air- and Gasfilter Type DELTA-KF/G

For particle retention

Quick cover closure Type DELTA-BSV and -SSV

Made of stainless steel and carbon steel

Self-cleaning filter
Type DELTA-STRAIN 400-RS

Basket filter
Type DELTA-SKS-05

Filter candles for the industrial nominal filtration

Filtermaterial of PP (FDA Grade), Polyester, Nylon, Cotton, glass fibre, stainless steel, filled with charcoal, impregnated Cellulose, Resin bounded Fibres.

Filter rates from 0,5 µm – 10000 µm.

Filter candles for Polymer filtration

Made of multilayered fabrics and mesh of stainless steel

For high differential pressures

Strainer basket inserts and Filter baskets

All kinds as well as Repairs
(even other brands)

Filter bags Type DELTA-BAG

Material PP, Polyester, Nylon etc.

Automatic backflush-filter
Type DELTA-BFF

FILTERSYSTEMS

Mobile or stationary Filter units

Completely piped with pumps, fittings, control systems etc.
Planning and manufacturing on customer requirement

FILTER- and APPARATUS ENGINEERING

Engineering and apparatus construction: on customer requirement

Manufacturing: design acc. German AD2000-Merkblatt and PED 2014/68/EU, ATEX 2014/34/EU, ASME-Code etc.

Quality assurance: acc. ISO 9001:2008

Welding process: E, UP, WIG, MIG, MAG

Certification: TÜV as well as customers requirement

Coating: Halar, PTFE, Abcrite, rubber coating etc.

Filter inserts

If a specific application is not mentioned, we still ask for your request. On request, we send you our detailed brochures.
